Trash to Treasure Art Project

Now it's your turn to help keep trash out of our landfills! Create a unique piece of art using **AT LEAST TWO** different pieces of recyclable solid waste. Your artwork can be in the form of a sculpture, items attached to a flat canvas, or whatever you like. The sky's the limit here! You can also use other materials such as glue or tape to help construct your masterpiece. Remember that not all trash can be recycled, so click the "Can it be recycled?" button to make sure you are using the correct materials. Log into your MyVRSpot account and use the Video Recorder tool to make a video of yourself showing off what you've made, and submit that video to our Google Classroom no later than Friday at 2:30pm. Be sure to include the following things in your video:

- A clear view of your artwork
- A description of the two (or more!) pieces of recyclable solid waste, as well as any other materials you used
- The name of your masterpiece – get creative with this!
